

July 12, 2010

To whom it may concern:

We recently completed a 13,000 square foot renovation for our new office space. JT Low Voltage & Data Networking had the responsibility for the computer and phone cabling as well as the installation of lighting and all the electrical work. The results were fantastic. We really appreciated all the work they did to make this project a success.

JT Low Voltage completely rewired all the phone and data connections in the space, this was done on time and exactly as we specified. The electrical work will make it much easier to manage our operation and expand our data center as needed.

In addition, we are very pleased with the way the telephone and data racks are laid out and how easy it is to trace connections and make changes as needed without requiring a lot of time or effort.

I highly recommend JT Low Voltage for a quality job, the extra effort they put in made our project a tremendous success.

Sincerely,

Alan D. Isaacson
