

**I met Jimmy through the BNI Network and was very impressed with his work history and his time with SNET, SBC GLOBAL, and ATT. He shared stories of things worked in those days. Often times he had to be very creative to get the Job done while pioneering his way through new types of cabling, connections, interfaces, and Technologies.**

**I would hear weekly Testimonies at the BNI meetings of how Jimmy and his crews would wear shoe covers while working in folks' homes and having conversations with clients that went along the lines of them telling Jimmy what they wanted, and Jimmy would share a story of working with someone else looking to do the same thing - and advising the client of a better way for a much better installation and better result long term, often saving the clients a great deal of money, while doing the work and leaving the clients home spotless**

**Like they had never been there. This is a HUGE deal to a homeowner that has a Luxurious Home and serious attention to detail.**

**Jimmy would often share the before and after photos of his work, showing impeccable detail and neatness.**

**One of the other Things I Love about Jimmy is his Family Centered Leadership approach. Jimmy shared how he and his Large**

**Greek and Lovable family would Team up together for large projects. We would hear stories of how he and his family would be serving**

**At his Church doing things for the Community, or getting together to make large batches of Jarred Tomato Sauce from the Family Garden.**

**When we first got together many years ago to look at a project together, I was impressed at his approach and his level of detail.**

**He keeps a small notepad to jot down things as we walk through the sites. In one particular instance - we had been called back to a client that was on hold for 2 years, we walked the site again - Jimmy remembered every little detail from memory without his notepad.**

**The Architect and Engineer for this project were amazed at his ability to remember even the smallest of details.**

**And when it comes to Jimmy's work ethic, firstly - he almost always answers his phone - REALLY! , unless he is on a ladder in that case you always get a callback. If you have an appointment at 9 AM, you will find Jimmy always there 30 Minutes before his appointment.**

**That is Old School Integrity and Character right there!**

**I want to share what I believe is the most compelling testimony. We were working on a very large and complex project and were doing the first site inspection after the work was completed. The Engineer doing this inspection is the Top Engineer and Technical Spec Writer for the state of CT ( Nicholas D'Agostino ). When he completed the inspection Nick Said that in his over 20 + Years of doing this,**

**This was the Cleanest and Nicest Installation that he had ever seen! THANK YOU JIMMY!**

**If you are considering Jimmy and his company for any work, You will not find a better Man for the Job!**

**Jimmy's work is so Excellent - he is not just an incredible Craftsman - Jimmy is an Artisan!**
