To Whom it May Concern,

We recently built a 10,000 square foot custom home in Westport, CT. JT Low Voltage & Electrical Services completely designed/installed all of the electrical/low voltage connections for the entire project including all lighting, switching, mechanicals, plugs, voice/data connections, wifi, cameras, A/V and Control for home automation.

They were punctual, neat, professional and a pleasure to work with. Their attention to detail and recommendations were greatly appreciated and the end result was everything we could have wished for and more! Aside from the above mentioned project, JT Low Voltage & Electrical Services helps us to maintain all of our properties in the Fairfield County area.

They always answer the phone and resolve any issues in a timely, professional and reasonable manner. It is without hesitation or reservation that we would recommend using JT Low Voltage for all of your electrical needs.

Regards,

Eleferios Tsiropoulos
